

Lab 11: Qt Programming

Introduction

In today's lab, we are going to complete QT's tutorial.

Problem 0: Qt for Beginners

Complete the tutorial over at <https://doc.qt.io/qtcreator/creator-writing-program.html>. You will at some point probably have to make a custom kit for your desktop. If you are unsure how to do this, go here: <https://doc.qt.io/qtcreator/creator-targets.html>. For your input.txt file required, please generate a few paragraphs from <http://www.randomtextgenerator.com/>. Include a final screenshot of your application functioning in your repo along with the project code.

Epilogue

Make sure to commit your changes to the source files as well as the .pro file for compiling your code.
